

Project Health is grant funded with the State of Michigan, the CDC and community partners, ProMedica Bixby Hospital, United Way, Lenawee Health Department and the YMCA.

**Project Health's key focus areas in managing  
and preventing chronic disease are to:**

- Decrease the existence of overweight/obesity, prevent or delay the onset of Type 2 diabetes
- Educate the public about current and emerging health issues linked to diabetes, obesity and high blood pressure.
- Promote community partnerships to identify and solve community health problems related to obesity and diabetes
- Advise and recommend programs that support individual and community health improvement efforts
